No compressor stations! NC has had enough pollution problems.....coal ash in water being a large one. We need to be working on ideas that benefit the lives in NC not endanger. This is once again some cheap idea to benefit corporations who want to go as cheap as they can and to>>>>> with the public and wildlife and the areas that depend on it for their living for tourists. Money and government at this time is only out to enhance their own pockets, people are dispensable. Look back in history and you will find previous examples how that ends..... Don't sell Carolina for a pocket of cash you doing so is placing a price tag on the children and thier future.
